In a world that seems increasingly complex and unpredictable, it's easy to feel overwhelmed and anxious. We're constantly bombarded with news of crises, from climate change to economic inequality to political unrest. It can be hard to know what to believe, and even harder to see a way forward.

In their groundbreaking book, *How Everything Can Collapse*, Pablo Servigne and Raphaël Stevens offer a sobering look at the science of collapse. They argue that our modern world is built on a foundation of unsustainable practices, and that a collapse of our civilization is not only possible, but likely.

Servigne and Stevens draw on a wide range of disciplines, from history to psychology to economics, to build their case. They show how past

civilizations have collapsed, and how the factors that led to their downfall are present in our own society today. They also discuss the psychological and emotional challenges that we will face if and when collapse occurs.

While *How Everything Can Collapse* is a sobering read, it is also a hopeful one. Servigne and Stevens believe that we can avoid collapse if we act now. They offer a number of practical steps that we can take to build a more sustainable and resilient society. These steps include:

- Reducing our reliance on fossil fuels

- Transitioning to renewable energy sources

- Rebuilding local food systems

- Strengthening community ties

- Investing in education and healthcare

How Everything Can Collapse is a must-read for anyone who is concerned about the future of our planet. It is a timely and important book that offers a clear-eyed look at the challenges we face, as well as a path forward towards a more sustainable and resilient future.

About the Authors

Pablo Servigne is a French researcher and author. He is the co-founder of the research collective, the Resilience Institute. Raphaël Stevens is a Belgian journalist and author. He is the co-founder of the online magazine, *The Shift*.
