* Seeds: A mix of different seeds, such as millet, canary seed, and sunflower seeds, is a good base for your budgie's diet. * Pellets: Pellets are a good source of vitamins and minerals, and they can help to prevent obesity. * Fruits and vegetables: Budgies love to eat fruits and vegetables,

such as apples, bananas, carrots, and spinach. * Fresh water: Fresh water should always be available to your budgie.

You should feed your budgie about 1/4 to 1/2 cup of food per day. Divide this amount into two or three feedings.

Housing Your Budgie

Budgies need a cage that is at least 18 inches long, 12 inches wide, and 18 inches high. The cage should have plenty of perches for your budgie to sit on, as well as toys to keep it entertained.

The cage should be placed in a quiet area of your home, away from drafts and direct sunlight.

Grooming Your Budgie

Budgies need to be groomed regularly to keep their feathers clean and healthy. You should brush your budgie's feathers with a soft brush once or twice a week. You should also trim your budgie's nails and beak as needed.

If you think your budgie is sick, you should take it to a veterinarian as soon as possible.
